- Site works should have commenced this week (if not already started) for the entrance sign and surrounds.
- I expect that I will have the final boat ramp location report next week and will email as soon as I receive it.
- Council has commenced the budget process for next year. It is important that the GTTP review the draft management plan and budget and make any comments in relation to funding of works and priorities (it is understood that this will be sent to you directly as the principle consultative group).
- The Development Application for the Foreshore Remediation Works is expected to be lodged within the next couple of weeks.

The continuing delays in the foreshore works are extremely disheartening given that they were scheduled to commence in February this year.
